

- Create, view and assign Work Orders with single stage or multi-work stages
- Manage work through curated "workflows" that standardize how work is completed
- View status, capture work details via forms, close and summarize all work completed

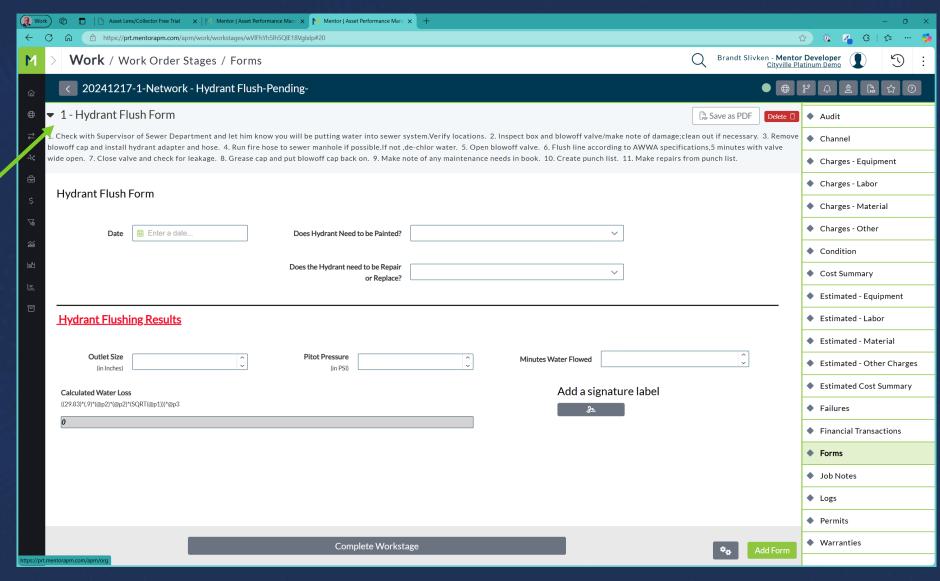

Workflow including clear instructions for completing tasks/work

Manage charges for equipment, labor, materials with Cost Summary

Dynamic forms to capture data and details, including triggers to action notifications and follow up work based on workflows/inputs

Fully integrated Mobile app to complete Work Orders in field (supports both online and offline modes)

Example of a Form to capture data in field
